## SINCE 1936

Dias Ruivo has been perfecting the art of leather making for over eight decades. The company remains a family business to date, proud of having a skilled team of craftsmen based in Oporto, Portugal.

Our mission is to supply the industry of footwear, leather goods and furniture with high quality bovine leather, in a vast array of styles and short lead times.

Each year, we celebrate color and texture in two seasonal collections. Enjoy.

## SUSTAINABILITY

We work with bovine leather only, thus our job is to transform a by-product of the food industry into a luxurious material, which lasts for generations and honors the memories of both men and animals.

In the move towards a more sustainable industry model, we are developing cleaner tanning techniques, which rely mostly on vegetable extracts and low water consumption.

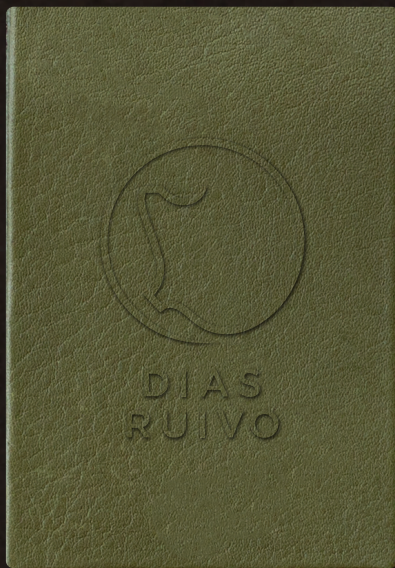

Leather is for life and life is better with leather.
